RUTHLESS SLAUGHTER OF CHRISTIANS BY TURKS

London, Sept. 20.—Viscount Bryce, formerly British ambassador to the United States has sent to the Associated Press a plea that America try to stop the slaughter of Armenians.

"The Turkish government has been carrying out with relentless cruelty a plan for exterminating Christianity by killing off Christians of the Armenian race," says the Viscount. "Accounts from different sources agree that over the whole of eastern and northern Asia Minor and Armenia the Christian population is being deliberately exterminated, the men of military age being killed and the younger women seized for Turkish harems."

The so-called Leve Harper will is coming up tomorrow.

Training the Child.

A child's mind and spirit will be sweeter and more sympathetic for a knowledge of music. It is as natural for a child to sing as it is for the child to talk. Given the knowledge of music's rhythm the child will easily slip into dancing, one of the best arts for giving grace and poise of carriage.

Where Law Presumes.

In cases where husband and wife are accidentally killed together, the common law presumes that the man, being the stronger, outlived the woman, no matter for how short a time.

"Golden Number."

The "Golden Number," held of so high importance by scientists and soothsayers of olden times, dates back to Meton, an Athenian astrologer, about 430 years B. C. To find the golden number, add one to the date and divide by 19, the number of years in the moon's cycle. The quotient is the number of cycles since the Christian era and the remainder is the golden number.

REAL INDIANS TO ASSEMBLE IN KANSAS

REAL AMERICANS WILL ASSEMBLE IN ANNUAL CONGRESS AT LAWRENCE, KAS., FOR CONFERENCE.

Indians from all over the United States are preparing to send their most brilliant leaders to a national congress in Kansas. Already several distinguished red men are in Lawrence making ready for the conference of the Society of American Indians, a national organization of "real Americans." Instead of a great tepee of buffalo hides, and a mighty medicine dance, these modern Indians will convene at Kansas University and then appeal for their rights and responsibilities by the power of logic and scholastic oratory.

Dr. Sherman Coolidge, a full-blood Arapahoe, the president of the society is now at the university, where he has opened up his headquarters. With him is Dr. Henry Roe-Cloud, a Winnebago Indian and a Yale graduate. Dr. Roe-Cloud is the founder of the Roe Indian Institute at Wichita, Kan. Arthur C. Parker, secretary of the society, a Seneca, leaves Albany, N. Y. today for the Indian headquarters to close up the preliminary program and local arrangements.

The Indian leaders are gathering this year to demand that greater responsibility be allowed every member of the red race in the country. They believe that governmental paternalism does not promote progress and does not count for efficient race development. The Indians are striking out for manhood, American citizenship and competency. Hundreds of noted white citizens are backing them. Among these are six college presidents, and many college professors, lawyers, professional men and men in public life. Nearly all the old-time friends of the race are associate members.

The Indians themselves do not lack for talented men, for as members they have doctors, lawyers, clergymen, teachers, scientists, newspaper men and hundreds in the lower walks of life. These are determined to see the end of the "Indian problem." They have national headquarters in the Barrister building, Washington, D. C., where they watch congress and the moves of the Indian bureau and they publish a "Quarterly Journal" that has attained the position of being the only national American Indian magazine. Its editor is a Seneca Indian on the staff of the University of the State of New York.

The Society of American Indians hopes to bring out in its platform a plan for a general betterment of the race. This is its fifth conference, all of which have been held at great universities. The Indian today fights with brain and wit, and has pulled out the feathers of his war bonnet for pens.

Many visitors and friends of the Indian are expected to attend the Indian council.

Daily Thought.

The perfectly balanced man would be a nonentity. To be interesting or to accomplish anything in this world a certain amount of one-sidedness, enthusiasm or partisanship is essential. —Bruce Calvert.

Growth of the Finger Nails.

Finger nails grow more quickly in summer than in winter. The middle finger grows the fastest and the thumb the most slowly.

Less Than Human.

Tom, the country six-year-old, presenting himself one day in even more than his usual state of dust and disorder, was asked by his mother if he could not like to be a little city boy, and always be nice and clean in white suits and shoes and stockings. Tom answered scornfully: "They're not children; they're pets." —Harper's Monthly.

Scamander a Remarkable Stream.

The Scamander is one of the most remarkable rivers for the grandeur of its source—a yawning chasm in Mount Gargarus, shaded with enormous plane trees, and surrounded with high cliffs, from which the river impetuously dashes in all the greatness of the divine origin assigned to it by ancient fable.
